Engineering and Science
Year: Btech 2nd Year

TITLE:
Innovations in Telugu Language Model and Text-to-Speech Technology

INTRODUCTION

The project focuses on "Telugu Language Model and Text-to-Speech Technology". The primary objective is to develop a comprehensive system that can process and generate text in the Telugu language. This involves creating a large-scale language model that can understand and generate natural language text, as well as developing a text-to-speech module that can convert text into spoken audio. The project aims to contribute to the field of natural language processing and speech synthesis, particularly in the context of Telugu language, which is less explored compared to major languages like English and Hindi.
