# SREE DATTHA GROUP OF INSTITUTIONS

Nagarjuna Sagar Road, Sheriguda(V), Ibrahimpatnam(M), Greater Hyderabad – 501510,  
Telangana State.

## Requisition Letter

Date : 13 Aug 2018

From  
Head of the Department  
Electrical and Electronics Engineering  
Sree Dattha Group of Institutions  
Sheriguda, Hyderabad.

To  
Mr./Ms./Mrs. A Vinod  
Asst Professor  
Electrical and Electronics Engineering  
Sree Dattha Group of Institutions  
Sheriguda, Hyderabad.

Sub : Reg conduction of Workshop on PLC and SCADA Programming EEE II Yr.

The market for PLC and SCADA is growing globally and has extremely high demand in the industry. To upgrade the skills of the students as per the requirement of the industry we are required to train our students in this area. Hence, you are requested to organize a program for our students to upgrade the skills in PLC and SCADA.

Kindly revert with the proposal and details as soon as possible.

Thanking You.

  
HEAD OF THE DEPARTMENT  
Electrical and Electronics Engineering  
Sree Dattha Group of Institutions  
Sheriguda, R.R. Dist - 501510.

**PRINCIPAL**  
Sree Dattha Group of Institutions  
Sheriguda, R.R. Dist - 501510.

Nagarjuna Sagar Road, Sheriguda(V), Ibrahimpatnam(M), Greater Hyderabad – 501510,  
Telangana State.

## Permission Letter

Date :15 Aug 2018

To  
Head of the Department  
Electronics and Electronics Engineering  
Sree Dattha Group of Institutions  
Sheriguda, Hyderabad.

Sub : Reg permission to organize Workshop on PLC and SCADA Programming EEE II Yr.

Sir,

We made the plan for the program and the schedule is as follows,

<b>Date</b>	20 Aug 2018 to 25 Aug 2018
<b>Syllabus</b>	<ul style="list-style-type: none"><li>• PLC Fundamentals</li><li>• Selection of PLC components</li><li>• I/O list selection</li><li>• Open-Circuit and Short-Circuit Tests</li><li>• Types of inputs and outputs</li><li>• Parallel operation of transformers</li></ul>
<b>Course Outcomes</b>	After the completion of course: 1.Students will be able to gain the knowledge and understanding about PLC and SCADA. 2.Students will be able to apply the knowledge on PLC and SCADA.
<b>Course objectives</b>	1.To make the students understand the basic fundamentals of PLC and SCADA. 2.To make the students implement PLC and SCADA.
<b>Resource Person</b>	Mr Arif,Assistant Professor SDES
<b>Participants</b>	II Year

I hereby kindly request you to grant the permission to conduct.

  
Coordinator

**SREE DATTHA GROUP OF INSTITUTIONS**  
Nagarjuna Sagar Road, Sheriguda(V), Ibrahimpatnam(M), Greater Hyderabad – 501510,  
Telangana State.

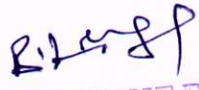

Date :17 Aug 2018

**CIRCULAR**

All the teaching staff and students of EEE II year are hereby informed that a program on “PLC and SCADA Programming”, will be organised from 20 Aug 2018 to 25 Aug 2018 by Department of Electrical and Electronics Engineering. All the students and the faculty are informed to enroll for the program and contact the coordinator for further queries, if any.

Faculty Coordinator/s :

1. Mr./Ms./Mrs. A Vinod

## SUMMARY OF THE PROGRAM

1. Title of the activity : Workshop on PLC and SCADA Programming
2. Program Type : Skill Development Training
3. Dates: 20 Aug 2018 to 25 Aug 2018
4. Numbers of students participated:44
5. Number of faculty participated:3
6. Objective: To provide the opportunity for the EEE Students to get the exposure on PLC and SCADA Programming.
7. Benefits : Students will get exposure and obtain the knowledge of PLC and SCADA and its application on different areas.
8. Faculty Coordinator: Mr./Ms./Mrs. A Vinod
9. Student Coordinator: D Srikanth 179P1A0201
10. Resource Person Name : Mr Arif,Assistant Professor SDES
11. Description:

The session was inaugurated by the coordinator and explained the uses of PLC and SCADA to the engineering students and later, the program was handed over to the resource person Mr Arif, Assistant Professor.

The term **SCADA** stands for **Supervisory Control And Data Acquisition**. A SCADA system is a common process automation system which is used to gather data from sensors and instruments located at remote sites and to transmit and display this data at a central site for control or monitoring purposes. The collected data is usually viewed on one or more SCADA Host computers located at the central or master site.

**PRINCIPAL**

Sree Dattha Group of Institutions  
Sheriguda, R.R. Dist - 501510.

## SREE DATTHA GROUP OF INSTITUTIONS

Nagarjuna Sagar Road, Sheriguda(V), Ibrahimpatnam(M), Greater Hyderabad – 501510,  
Telangana State.

A real world SCADA system can monitor and control hundreds to hundreds of thousands of I/O points. A typical Water SCADA application would be to monitor water levels at various water sources like reservoirs and tanks and when the water level exceeds a preset threshold, activate the system of pumps to move water to tanks with low tank levels.

Common analog signals that SCADA systems monitor and control are levels, temperatures, pressures, flow rate and motor speed. Typical digital signals to monitor and control are level switches, pressure switches, generator status, relays & motors.

There is typically another layer of equipment between the remote sensors and instruments and the central computer. This intermediate equipment exists on the remote side and connects to the sensors and field instruments. Sensors typically have digital or analog I/O and these signals are not in a form that can be easily communicated over long distances. The intermediate equipment is used to digitize then packetize the sensor signals so that they can be digitally transmitted via an industrial communications protocol over long distances to the central site.

Students of II Year EEE, attended the program and gained the valuable insights.

Faculty of SDGI also participated in the program and coordinated for the successful completion.

11. Description:

The session was inaugurated by the coordinator and explained the uses of Robotics to the engineering students and later, the program was handed over to the resource person Mr Ashok, Assistant Professor.

Robots are required to have much higher mobility and dexterity than traditional machine tools. They must be able to work in a large reachable range, access crowded places, handle a variety of workpieces, and perform flexible tasks. The high mobility and dexterity requirements result in the unique mechanical structure of robots, which parallels the human arm structure. This structure, however, significantly departs from traditional machine design. A robot mechanical structure is basically composed of cantilevered beams, forming a sequence of arm links connected by hinged joints. Such a structure has inherently poor mechanical stiffness and accuracy, hence is not appropriate for the heavy-duty, high-precision applications required of machine tools. Further, it also

Telangana State.**

implies a serial sequence of served joints, whose errors accumulate along the linkage. In order to exploit the high mobility and dexterity uniquely featured by the serial linkage, these difficulties must be overcome by advanced design and control techniques. The serial linkage geometry of manipulator arms is described by complex nonlinear equations. Effective analytical tools are necessary to understand the geometric and kinematic behaviour of the manipulator, globally referred to as the manipulator kinematics. This represents an important and unique area of robotics research, since research in kinematics and design has traditionally focused upon single-input mechanisms with single actuators moving at constant speeds, while robots are multi-input spatial mechanisms which require more sophisticated analytical tools.

Students of II,III & IV Year Mechanical, attended the program and gained the valuable insights. Faculty of SDGI also participated in the program and coordinated for the successful completion.

## Requisition Letter

Date : 13 Aug 2018

From  
Head of the Department  
Electronics and Communication Engineering  
Sree Dattha Group of Institutions  
Sheriguda, Hyderabad.

To  
Mr./Ms./Mrs. A Rajani  
Asst Professor  
Electronics and Communication Engineering  
Sree Dattha Group of Institutions  
Sheriguda, Hyderabad.

Sub : Reg conduction of Skill Development Program on Radar Systems ECE II,III,IV Yr

The market for RADAR systems is growing globally and has extremely high demand in the industry. To upgrade the skills of the students as per the requirement of the industry we are required to train our students in this area. Hence, you are requested to organize a program for our students to upgrade the skills in Radar Systems.

Kindly revert with the proposal and details as soon as possible.

Thanking You.

## Permission Letter

Date :15 Aug 2018

To  
Head of the Department  
Electronics and Communication Engineering  
Sree Dattha Group of Institutions  
Sheriguda, Hyderabad.

Sub : Reg permission to organize Skill Development Program on Radar Systems ECE II,III,IV Yr.

Sir,

We made the plan for the program and the schedule is as follows,

<b>Date</b>	20 Aug 2018 to 25 Aug 2018
<b>Syllabus</b>	<ul style="list-style-type: none"><li>• Introduction of Radar Systems</li><li>• Radar Equation</li><li>• CW and Frequency Modulated Radar</li><li>• Range and Doppler Measurement</li><li>• MTI and Pulse Doppler Radar</li><li>• Tracking Radar</li></ul>
<b>Course Outcomes</b>	After the completion of course: 1.Students will be able to gain the knowledge and understanding about Radar Systems 2.Students will be able to apply the knowledge on Radar Systems
<b>Course objectives</b>	1.To make the students understand the basic fundamentals of Radar systems. 2.To make the students implement Radar Signals
<b>Resource Person</b>	Mrs T Srujana,Assistant Professor SDES
<b>Participants</b>	II,III,IV Years

I hereby kindly request you to grant the permission to conduct.

  
Coordinator

## SUMMARY OF THE PROGRAM

1. Title of the activity : Skill Development Program on Radar Systems ECE II,III,IV Yrs
2. Program Type : Skill Development Training
3. Dates: 20 Aug 2018 to 25 Aug 2018
4. Numbers of students participated: 100
5. Number of faculty participated:3
6. Objective: To provide the opportunity for the ECE Students to get the exposure on Radar systems and Applications.
7. Benefits : Students will get exposure and obtain the knowledge of Radar Systems and its application on different areas.
8. Faculty Coordinator: Mr./Ms./Mrs. A Rajani
9. Student Coordinator: K Nikhil 179P1A0401
10. Resource Person Name : Mrs T Srujana,Assistant Professor SDES
11. Description:

The session was inaugurated by the coordinator and explained the uses of Robotics to the engineering students and later, the program was handed over to the resource person Mrs T Srujana,Assistant Professor.

RADAR is an electromagnetic based detection system that works by radiating electromagnetic waves and then studying the echo or the reflected back waves. The full form of RADAR is Radio Detection And Ranging. Detection refers to whether the target is present or not. The target can be stationary or movable, i.e., non-stationary. Ranging refers to the distance between the radar and the target. Radars can be used for various applications on ground, on sea and in space. The applications of Radars are listed below. • Controlling the Air Traffic • Ship safety • Sensing the remote places • Military

11. Description:

The session was inaugurated by the coordinator and explained the uses of Robotics to the engineering students and later, the program was handed over to the resource person Mrs G Shruthi,Assistant Professor.

The essence of Natural Language Processing lies in making computers understand the natural language. That's not an easy task though. Computers can understand the structured form of data like spreadsheets and the tables in the database, but human languages, texts, and voices form an unstructured category of data, and it gets difficult for the computer to understand it, and there arises the need for Natural Language Processing. There's a lot of natural language data out there in various forms and it would get very easy if computers can understand and process that data. We can train

the models in accordance with expected output in different ways. Humans have been writing for thousands of years, there are a lot of literature pieces available, and it would be great if we make computers understand that. But the task is never going to be easy. There are various challenges floating out there like understanding the correct meaning of the sentence, correct Named-Entity Recognition(NER), correct prediction of various parts of speech, coreference resolution(the most challenging thing in my opinion). Computers can't truly understand the human language. If we feed enough data and train a model properly, it can distinguish and try categorizing various parts of speech(noun, verb, adjective, supporter, etc...) based on previously fed data and experiences. If it encounters a new word it tried making the nearest guess which can be embarrassingly wrong few times. It's very difficult for a computer to extract the exact meaning from a sentence. For example – The boy radiated fire like vibes. The boy had a very motivating personality or he actually radiated fire? As you see over here, parsing English with a computer is going to be complicated. There are various stages involved in training a model. Solving a complex problem in Machine Learning means building a pipeline. In simple terms, it means breaking a complex problem into a number of small problems, making models for each of them and then integrating these models. A similar thing is done in NLP. We can break down the process of understanding English for a model into a number of small pieces. It would be really great if a computer could understand that San Pedro is an island in Belize district in Central America with a population of 16, 444 and it is the second largest town in Belize. But to make the computer understand this, we need to teach computer very basic concepts of written language. So let's start by creating an NLP pipeline. It has various steps which will give us the desired output(maybe not in a few rare cases) at the end.

Students of II Year CSE, attended the program and gained the valuable insights.

Faculty of SDGI also participated in the program and coordinated for the successful completion.

## SUMMARY OF THE PROGRAM

1. Title of the activity : Workshop on Scripting Languages CSE III Yr.
2. Program Type : Skill Development Training
3. Dates: 11 Feb 2019 to 16 Feb 2019.
4. Numbers of students participated:19
5. Number of faculty participated:2
6. Objective: To provide the opportunity for the CSE Students to get the exposure on Scripting Languages and Applications.
7. Benefits : Students will get exposure and obtain the knowledge of scripting languages and its application on different areas.
8. Faculty Coordinator: Mr./Ms./Mrs. Hasitha P
9. Student Coordinator: M Srikar Reddy 169P1A0501
10. Resource Person Name : Mrs V Deepa,Assistant Professor CSE
11. Description:

The session was inaugurated by the coordinator and explained the uses of Scripting Languages to the engineering students and later, the program was handed over to the resource person Mrs V Deepa,Assistant Professor CSE.

All scripting languages are programming languages. The scripting language is basically a language where instructions are written for a run time environment. They do not require the compilation step and are rather interpreted. It brings new functions to applications and glue complex system together. A scripting language is a programming language designed for integrating and communicating with other programming languages.

11. Description:

The session was inaugurated by the coordinator and explained the uses of Scripting Languages to the engineering students and later, the program was handed over to the resource person Mr M Raju, Assistant Professor.

Mobile application development is the process of making software for smartphones, tablets and digital assistants, most commonly for the Android and iOS operating systems. The software can be preinstalled on the device, downloaded from a mobile app store or accessed through a mobile web browser. The programming and markup languages used for this kind of software development include Java, Swift, C# and HTML5.

## **SREE DATTHA GROUP OF INSTITUTIONS**

**Nagarjuna Sagar Road, Sheriguda(V), Ibrahimpatnam(M), Greater Hyderabad – 501510,  
Telangana State.**

Mobile app development is rapidly growing. From retail, telecommunications and e-commerce to insurance, healthcare and government, organizations across industries must meet user expectations for real-time, convenient ways to conduct transactions and access information. Today, mobile devices—and the mobile applications that unlock their value—are the most popular way for people and businesses to connect to the internet. To stay relevant, responsive and successful, organizations need to develop the mobile applications that their customers, partners and employees demand.

Students of IV Year ECE, attended the program and gained the valuable insights.

Faculty of SDGI also participated in the program and coordinated for the successful completion.
